BETTERMANN

Building Connections

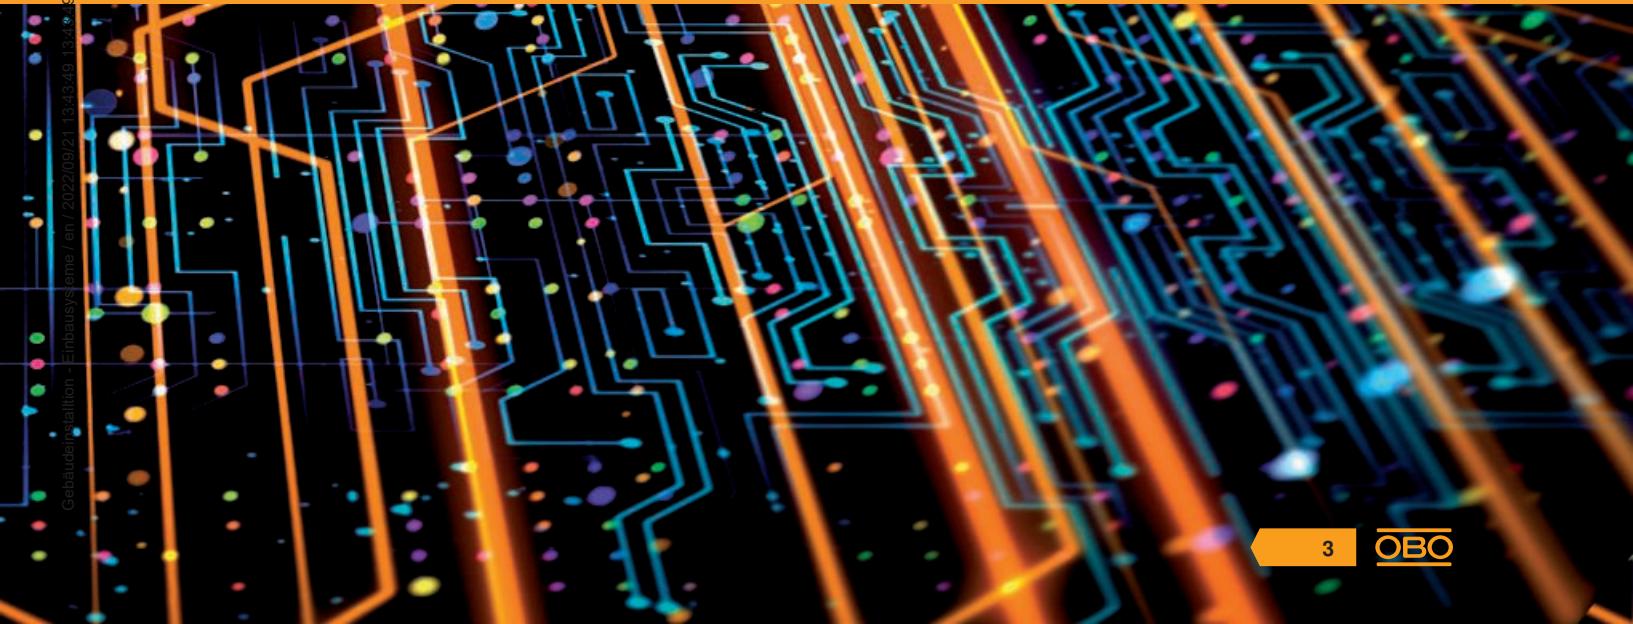

Digitalisation, the Energiewende (energy transition), mobility – the future is gathering speed. At OBO Bettermann, we're proud to be a driving force. And as a facilitator, we make connections. Today, we are already developing the innovative electrical infrastructure systems and solutions of tomorrow. Reliably, flexibly, sustainably.

Already today, OBO is one of the leading manufacturers of installation systems for the electrical infrastructure in buildings and plants. When it comes to the friction-free flow of power, energy and data, engineers and tradespeople worldwide rely on the comprehensive range from OBO.

OBO applies its slogan "Building Connections" to around 30,000 high-quality branded electrical products and services, which are used in application solutions for projects in industry, business and infrastructure.

OBO operates a global network and employs more than 4,200 people in more than 60 countries. The headquarters of the family company, which was founded in 1911, is located in Menden, Germany. In addition, more than 40 subsidiaries are present in markets on all continents.

Improved structure, sharpened profile

Each of our products carries a benefit which only the OBO brand can offer. Products are developed, manufactured and tested with a high level of competence – from the idea through to the final check. From flawless logistics through to practical information – we can provide support at every level. We can offer additional security through certificates on the conformity of our products with the most important standards and directives. In a nutshell – OBO helps you more. In every location and in every phase of a project.

To maintain this, we continually challenge ourselves. Not as an end in itself but for the better processing of each customer's requests – fast, reliably and future-oriented. That is the reason we have not only established our three central application areas, but also reworked our catalogue structure. In this way, we can display our service offers more clearly, highlight the product benefits more effectively and illustrate the respective application areas more tangibly.

OBO Construct: Planning has never been so easy!

OBO Construct is a collection of planning tools that were developed especially for electrical installation engineers and planners. This platform offers support in product configuration and a selection aid for the matching systems, and automatically generates a corresponding parts list. With OBO Construct, you can therefore access and edit projects at any time and at any location – via your smartphone, tablet or desktop PC. Versions of the app are available for iOS and Android.

OBO Academy: From the basics to the concrete application

The OBO Academy has been offering an extensive further education programme for many years. This programme helps with first-hand information and expertise, giving you that essential head start in terms of in-depth knowledge. In our seminars, planner days or online seminars, we provide you with current developments, trends, norms and regulations – systematically, comprehensively and practically oriented.

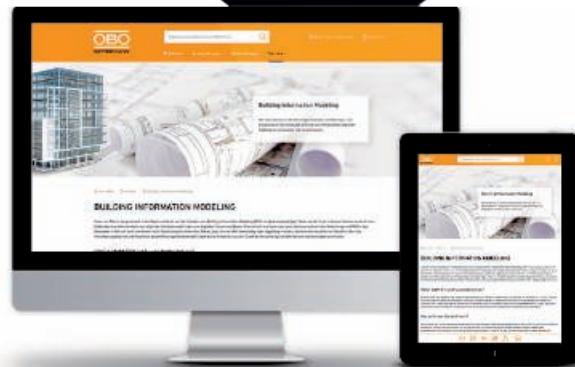

Planning virtually, implementing efficiently

When planning and implementing electrical technology, BIM (building information modelling) is becoming increasingly more important. We can now offer our partners the first solution to unlock the full potential of the BIM method for practical applications - giving you more planning efficiency, transparency and cost security with complex projects. Find out about the advantages of BIM@OBO now:

- Intelligent libraries structured according to individual systems
- Available for Revit, as a plug-in and directly via the OBO website
- Simple integration via drag & drop
- Practical display of material lists for ordering directly
- Intuitive user interface

Modul 45®-devices

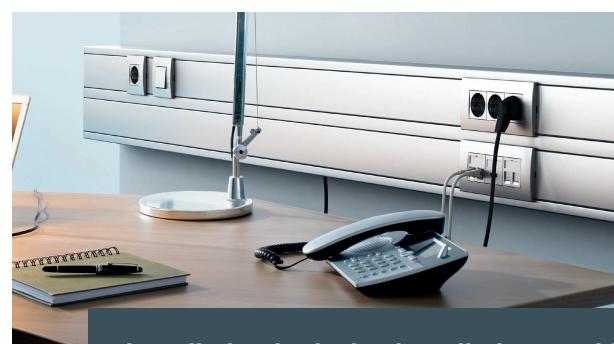

With their dimensions of 45 x 45 mm, the Modul 45® devices from OBO Bettermann are compact and space-saving. For this reason, the sockets, data and multimedia technology connections are ideal for use in underfloor systems, device installation trunking and service poles. The Modul 45® system makes optimum use of limited installation space.

The advantages of Modul 45® at a glance:

- Space savings thanks to compact design
- Modular structure
- Quick and easy planning
- Easy mounting
- High efficiency due to time and cost savings
- Wide range of application options
- Easy exchangeability

One system – many solutions

The Modul 45 devices from OBO Bettermann offer the right solution for every application – no matter whether you're dealing with sockets, data or multimedia technology.

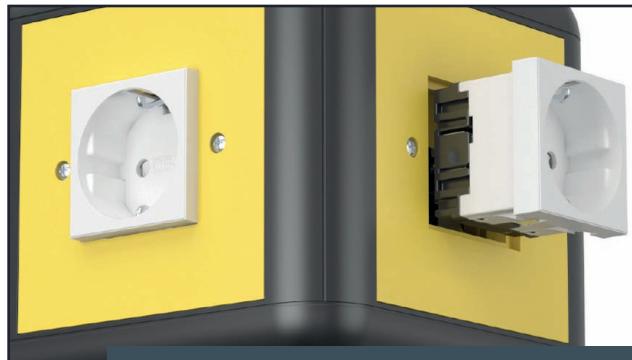

- Multiple sockets for economic device installation
- Sockets for international applications
- Modul 45connect sockets for quick, secure installation
- Data technology supports for data modules of different manufacturers
- Multimedia connection solutions for data, video and audio transmission

Connection of Modul 45® sockets

The screwless terminals correspond to IEC 60884-1 and are suitable for the connection of rigid cables of 1.5 to 2.5 mm². Each screwless terminal can accept two conductors.

Multiple sockets

The multiple sockets, in the double and triple versions, are particularly economic and time-saving during installation. In a standard installation, the wiring of the individual sockets takes a lot of time. This time is not required at all when installing the multiple sockets.

Time saved

The integrated screwless terminals and the tried-and-trusted locking fastening allow toolless mounting. The wide range of country-specific sockets offers the right solution for any system environment.

Modul 45® data and multimedia technology

Today, we cannot picture offices without a data network. Flexible cabling solutions and data connection modules are used with increasing frequency. OBO can offer various data connection modules, both with and without shielding: Cat. 5e, Cat. 6 and Cat. 6a. The data connection modules are simply snapped into the Modul 45 data technology support.

With the multimedia connection solutions, computer, video and audio connections can be installed in the different OBO system environments. No matter whether in the GES service unit, in cassettes or in System 55 – with the Modul 45 support plate, mounting is easy and quick.

Practical connection solutions

We have the right connection solution for every connection type: Whether you are routing pre-terminated cables or conventional installation cables.

- Solder connection or screw connection for conventional cable connections
- Connection cable or 1:1 coupling to connect pre-terminated cables

Integrated dust protection

Integrated dust protection flaps cover the data connection modules when unused. They protect them against dust and other outside influences. During use of the data socket, the dust protection flaps are pushed upwards. After the connection cables have been removed, the dust protection flaps close again automatically.

Modul 45® data technology support

A large selection of different data technology support is available for the installation of the connection modules. In so doing, data technology supports of other manufacturers can be installed.

Installation material for standard devices

Modul 45® in Rapid 45 and Rapid 80 device installation trunking

Modul 45 devices are engaged directly in the trunking without additional components. The installation opening of the Rapid 45 trunking is matched to the whole range of Modul 45 devices and thus offers flush installation.

Modul 45 devices are inserted in accessory mounting boxes with cover frames in the Rapid 80 trunking. This also allows the benefits of the Modul 45 devices to be integrated in the standard device installation trunking with matched design.

Modul 45® in ISS service poles

Modul 45 devices are also suitable for vertical installation in service poles. Installation is comparable with device installation in the device installation trunking: Either direct installation in the profile or using accessory mounting boxes with cover frame.

Service poles in office environments

Service poles in industrial environments

Device installation in 80 mm trunking systems

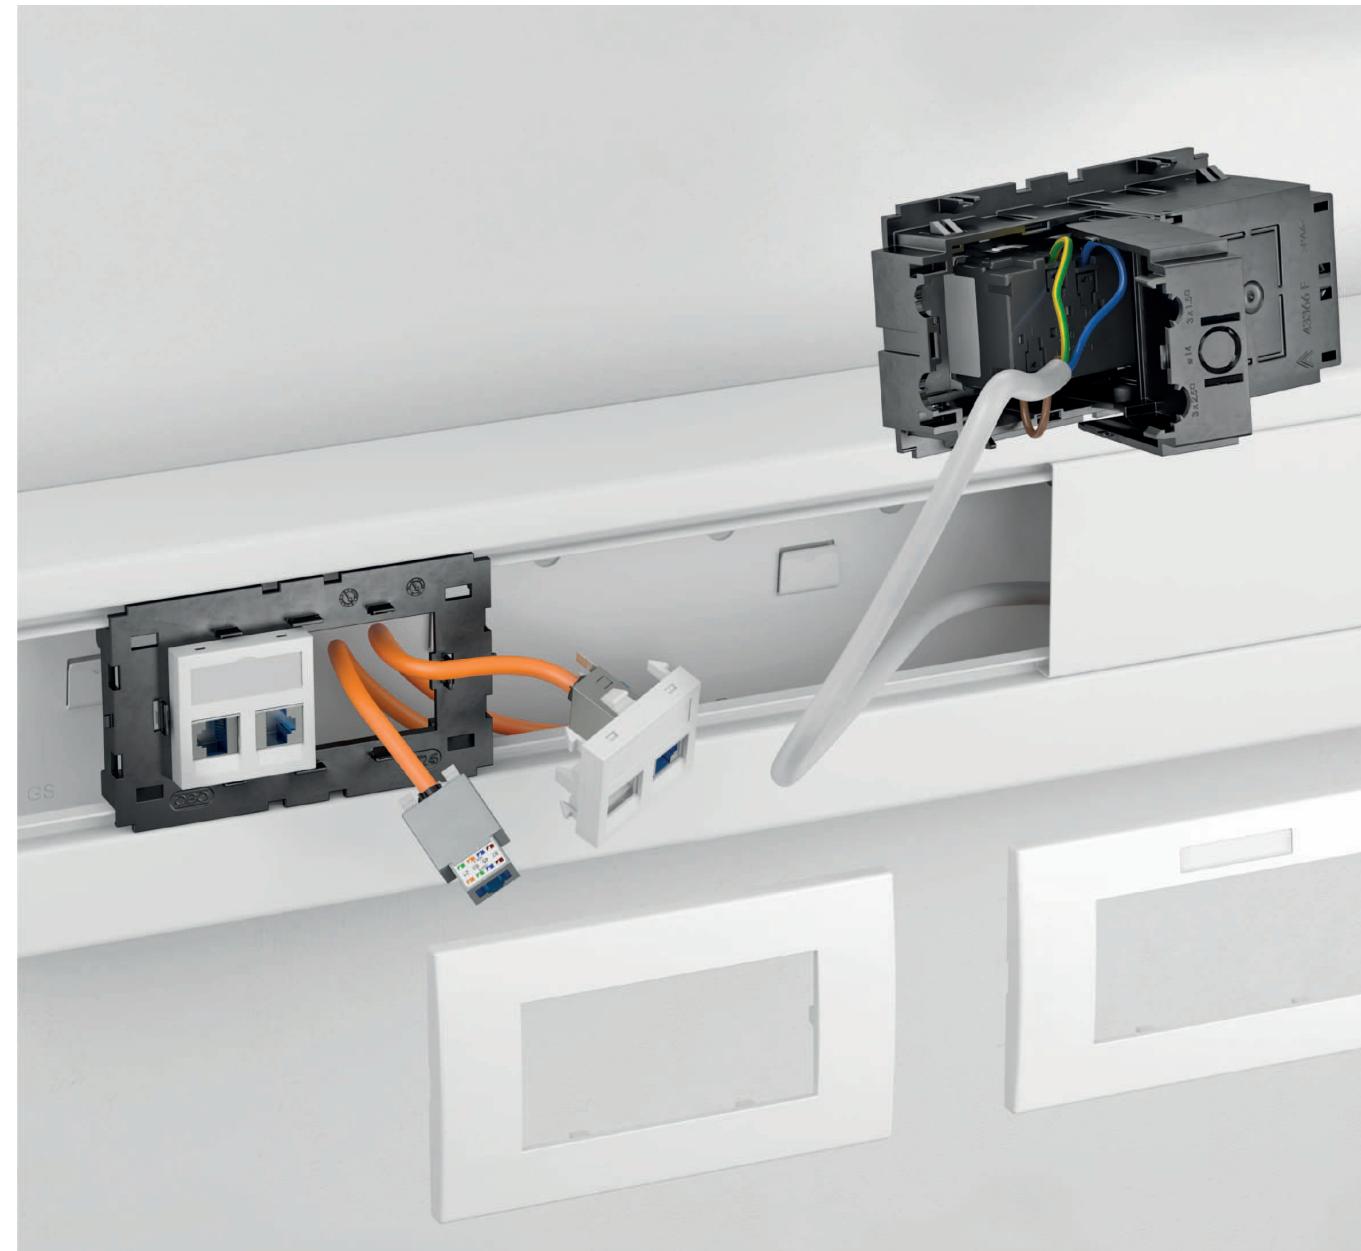

The use of device installation sockets and mounting supports with Modul 45 devices consistently continues the concept of toolless mounting.

Socket installation in accessory mounting box

Appropriate single, double and triple accessory mounting boxes are available for all Modul 45 socket units. Cable connection and strain relief occur after engagement of the sockets through the accessory mounting boxes, which are opened from the rear.

The labelling panel can be snapped directly onto the accessory mounting box and thus remains intact, even with retroinstallations at the installation location.

Data and multimedia installation in mounting supports

Single, double and triple mounting supports are available for the installation and combination of data and multimedia connections. The open mounting support allows installation with increased bend radii. As with the accessory mounting box, the cover plates are simply snapped onto the mounting support.

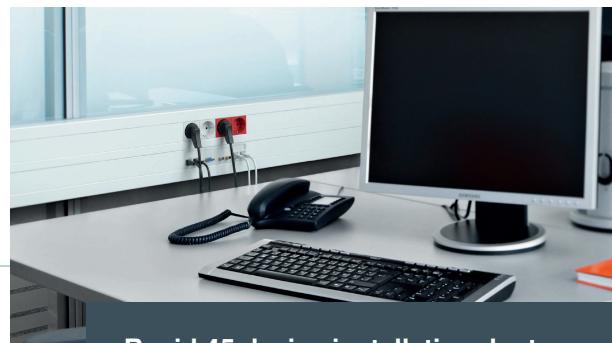

Modul 45connect®

Plug-in installation solutions for device installation ducts and service poles

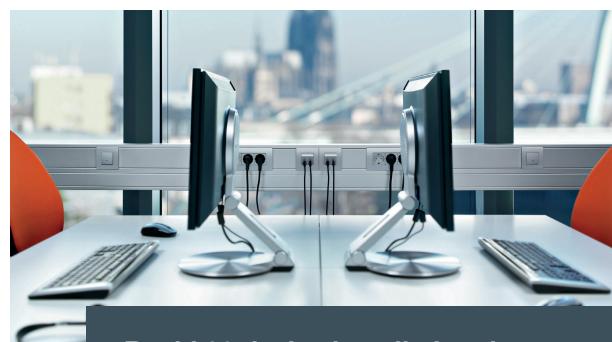

As continuously connectable installation technology, the Modul 45connect® range for device installation trunking and service poles offers the highest level of flexibility, security and cost-efficiency.

From energy distribution through to device connection in the trunking, the system offers all the required installation components.

Modul 45connect® in the Rapid 45 trunking

Rapid 45 trunking is marked by a slender design. It is ideally matched for direct installation of the Modul 45 range for sockets, data and multimedia installations.

Modul 45 connect 0° sockets are inserted in the Rapid 45 trunking with a front-side connection. This allows the toolless installation of connected sockets in the trunking profile. Connection adapters with integrated strain relief are specially available for use in Rapid 45.

Safe installation through encoded connection technology

Direct mounting in the trunking – without additional components

Modul 45connect® in the Rapid 80 trunking

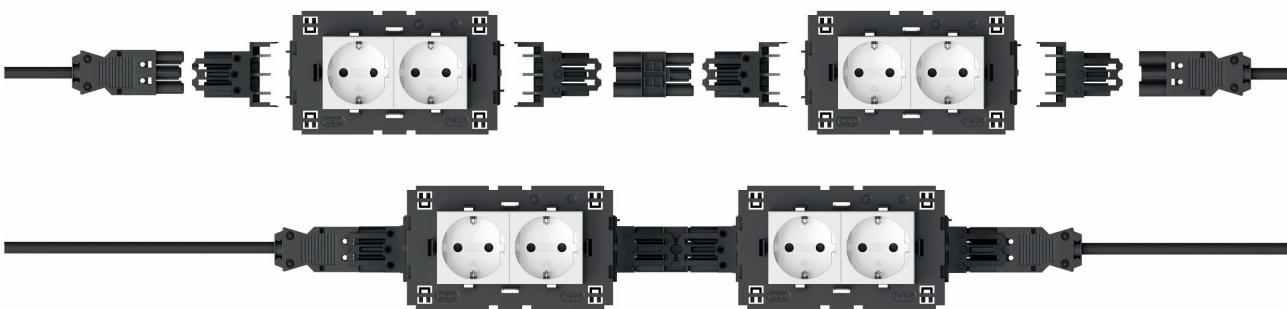

Rapid 80 trunking offers large trunking openings for device installation and sufficient space for large cable volumes.

The Modul 45 product range for sockets, data and multi-media installation is installed in the Rapid 80 trunking using accessory mounting boxes.

In Rapid 80, Connect 80 sockets are offered as a unit with an installation frame. The 0° Connect sockets are installed with a connection adapter with integrated strain relief.

This allows continuous, plug-in installation technology – there is no need for the conventional connection of sockets.

Safe installation through encoded connection technology

Direct mounting in the trunking – without additional components

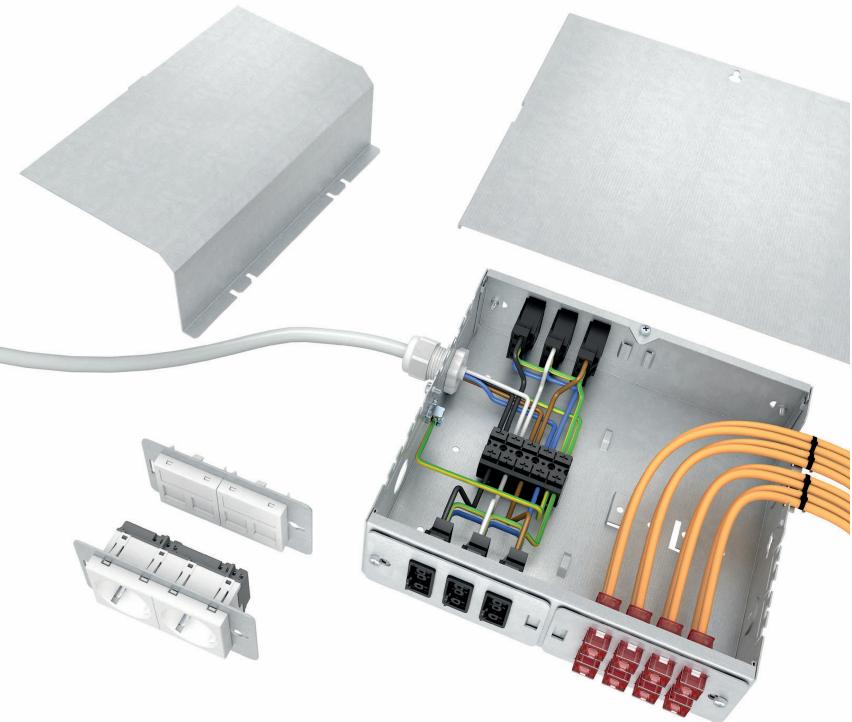

Modul 45connect® in service poles

Service poles offer direct access to the installation technology at the workplace. Service poles with 45 and 80 mm installation openings are offered.

Modul 45 connect 33° sockets are inserted in service poles with a front-side connection. These 33° Connect sockets can be arranged without gaps using connection adapters. Connection adapters with integrated strain relief are specially available for use in service poles.

Energy distribution via Consolidation Point

Consolidation Points are positioned centrally in the false ceiling and allow the supply of multiple service poles from the ceiling. This solution allows the distribution of power, data and multimedia.

Consolidation Points offer a high level of flexibility and combination options for power, data and multimedia connections.

The electrical supply is possible via both the Modul 45® sockets and the plug connector systems. In the housing, cover hoods can be used to separate the different sockets and to separate the power and data technology.

Data and multimedia technology can be installed in the housing conventionally or with pre-terminated data cables.

Plug connections

All the plug connections are equipped with the GST18i connector systems and strain relief. Black and white connectors and cable colours are suitable for labelling the different circuits. Connection cables with cross-sections of 1.5 mm² or 2.5 mm² and a wide range of plug connectors offer the right solution for every requirement.

Cost-aware

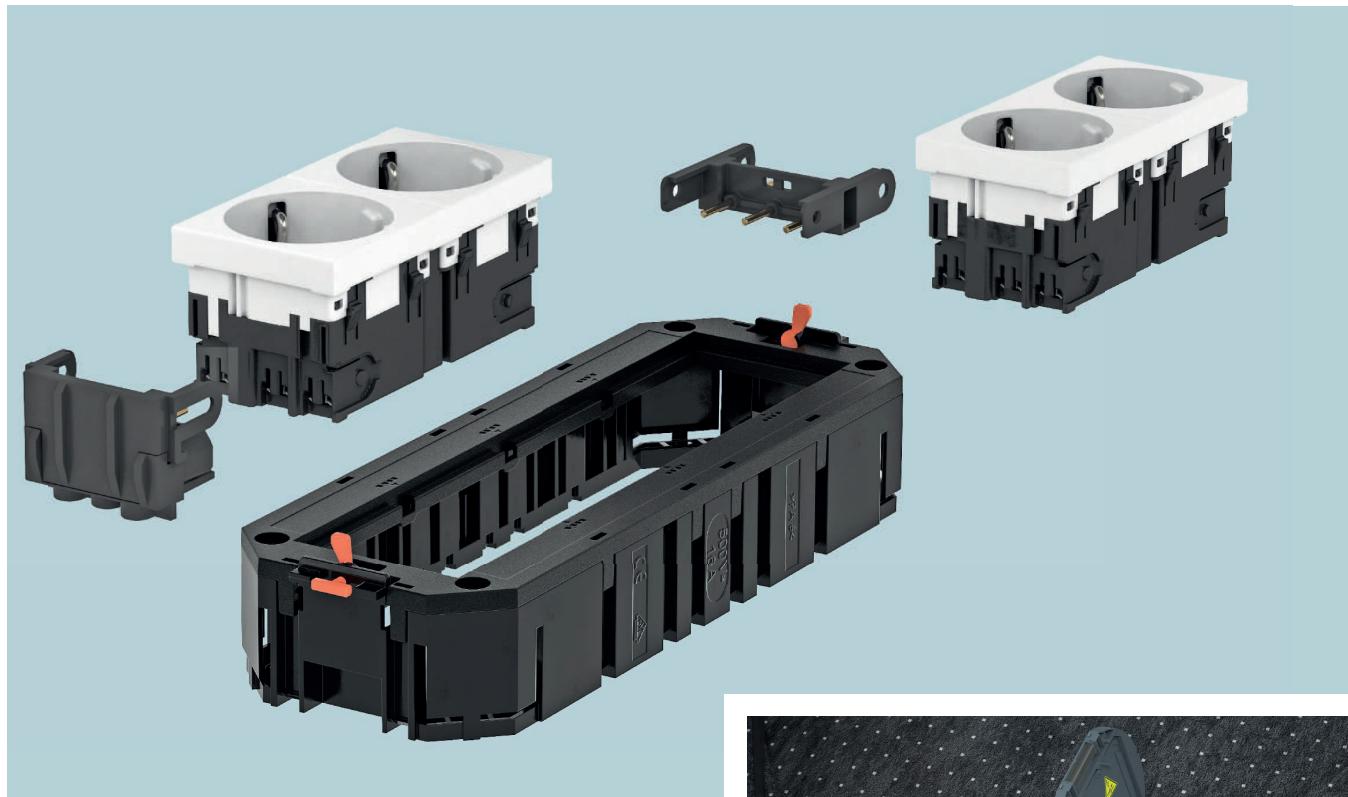

The efficient installation time and simple installation mean that Modul 45connect® sockets are a particularly economic solution.

Connection adapter GST18

The connection adapter VB-G GST 18 allows the arrangement of sockets in the Rapid 80 trunking system and in ISS service poles.

Modul 45connect®

Plug-in installation solutions for raised and cavity floors

The Modul 45connect for underfloor systems is a continuous, connectable installation technology. This is designed for installation in a system floor. Modul 45connect offers the highest level of flexibility, security and cost efficiency.

The system offers all the required installation components: From energy distribution through to device connection in the floor box.

Raised floor systems

Raised floor systems offer the highest flexibility in the use and planning of office workspaces. This flexibility can be used to the utmost through the use of plug-in connection solutions.

If there are changes of use, floor plates including the floor box can be adapted to the new room planning with little effort – disconnect the pre-terminated connection cable and connect it to the connection unit in the new position.

Energy distributor

Energy distributors are used in raised floors with removable floor plates. They are mounted at central points under the floor surfaces and supply the installed floor boxes in a star shape.

Plug-in connection unit

The ready-for-connection connect UTC universal supports are equipped with connectable connection adapters. The cables are connected directly to the underfloor distributors via connection cables.

Service outlets

All the service outlets from the standard product range can be used in raised and cavity floors. The GES service outlets are available in round and rectangular versions. Plastic or metal are used as materials. The plastic version is the tried-and-trusted solution for office installations. It is available in three colour variants. The metallic stainless steel or aluminium versions look refined and can carry an even greater load.

Other solutions are available for areas with increased floor load requirements.

Ready-for-connection universal support connect UTC

The connect UTC universal supports can be ordered as a ready-for-connection unit or freely terminated according to customer requirements.

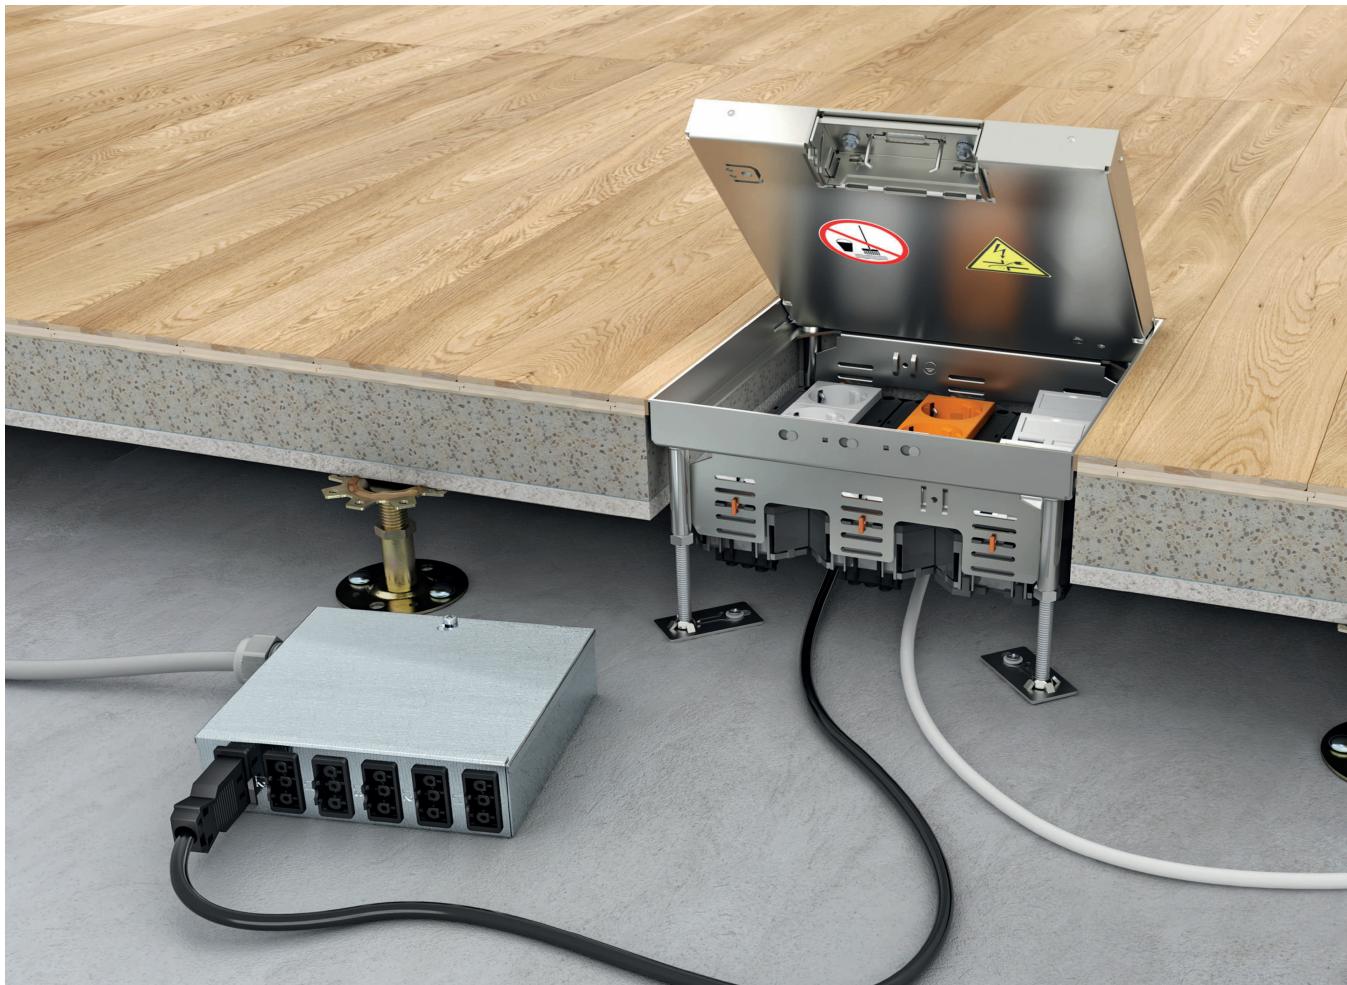

Combinations of up to two circuits are possible for each connection unit – also with surge protection.

Connection in the floor box

The plug connections on the Modul 45connect® sockets are located below the connection unit. This allows plug connections outside the floor box. The connected universal support is installed in the floor box by lowering it in the locking ladder. Fastening in the floor box is carried out using the turn-buckles in the locking ladder.

Cavity floors

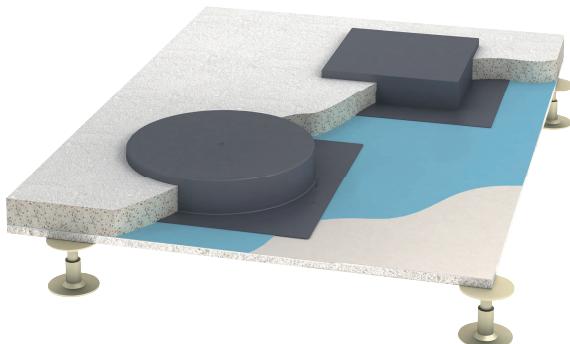

Cavity floors have a support layer of a joint-free, poured screed plate. The installation opening for the installation of floor boxes can be created in two ways in the cavity floor: Either the installation opening is created with a lined body before the screed work, or core drilling takes place after the screed work.

Cable routing

Beneath the screed plate, supply points for the installed floor boxes are set using energy distributors.

Cassettes

The compact, flush-floor cassettes offer power, data and multimedia connections in the smallest areas. The cassettes can be adjusted to the height of the floor and are available in round and rectangular designs. There are versions for dry, moist and wet-care floor coverings.

Installation benefits Modul 45connect®

Modul 45connect sockets can be mounted and connected with just a few actions. The GST18 adapters are engaged to the side of the sockets – incorrect installation is not possible due to the coding of the locking connections.

Connection adapter for 4x socket combination

The connection of Modul 45connect sockets is really easy: A plug connection is created using a connection adapter. There is no need for the otherwise necessary wiring work, considerably reducing the time required for mounting. This means that combinations of two double sockets in the UT4 universal support can be created rapidly.

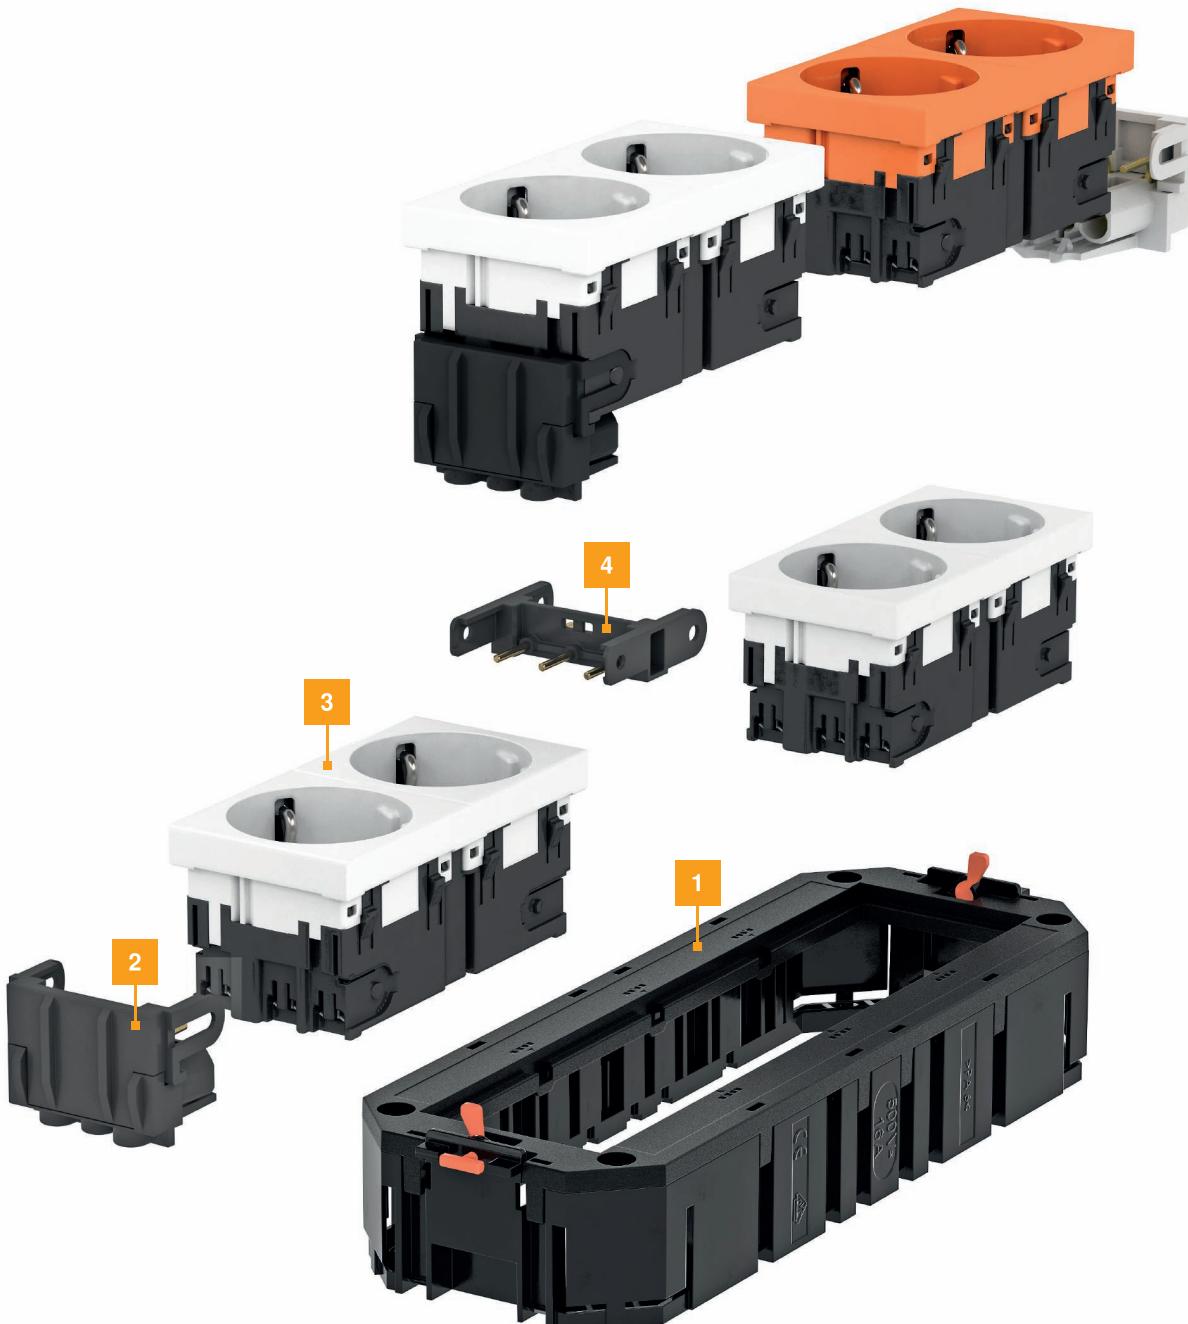

Connection adapter

An angled connection adapter with integrated strain relief is available especially for use in service outlets and cassettes. The connection adapter is available for the isolation of circuits in two colours (black and white).

Two circuits

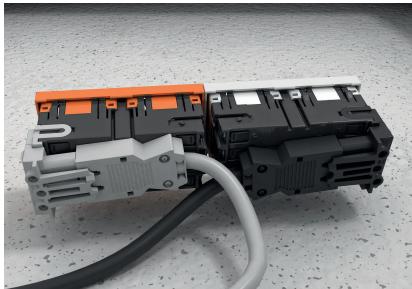

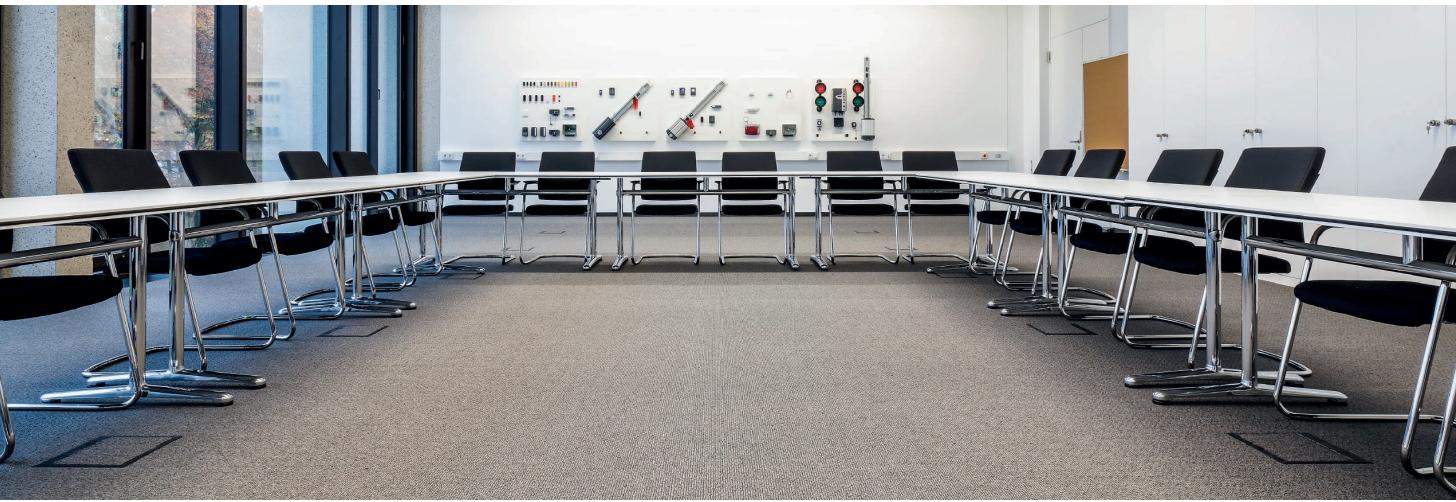

Combinations with two power circuits with triple, double and single sockets in UT universal supports are possible. In addition, the use of surge protection modules is also possible on double and triple sockets.

Modular structure

- 4** Modul 45connect connector

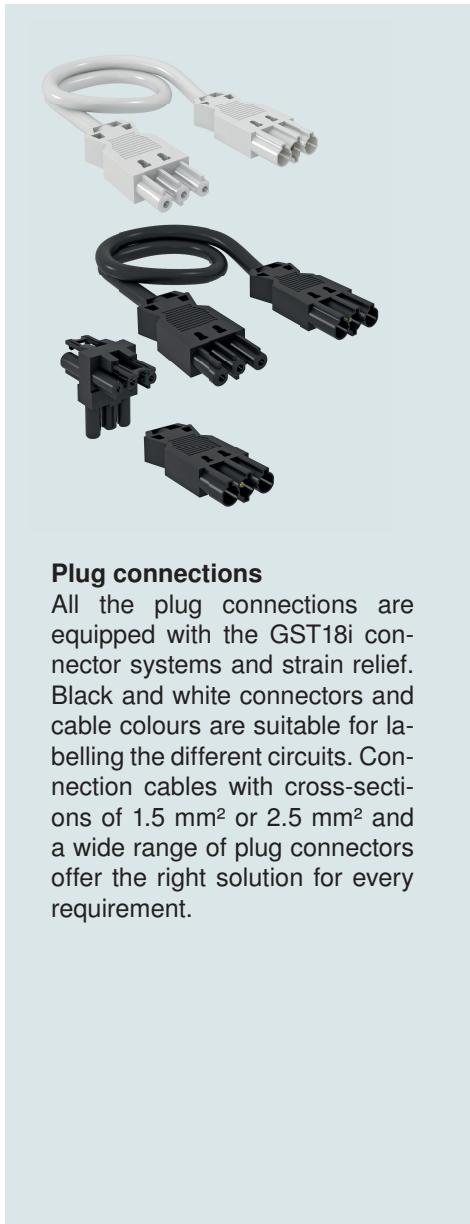

Safe

The Modul 45connect system is ideally suited for use in raised floors. Ready-for-connection module supports need only be connected to the heavy current cabling.

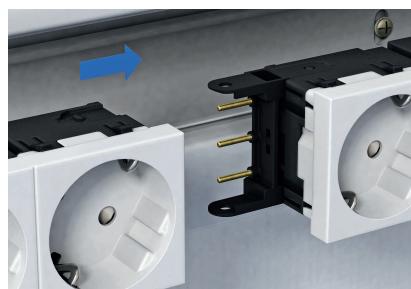

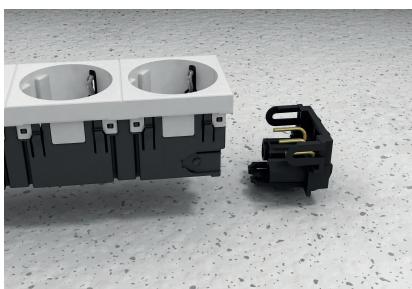

Cost-aware

The Modul 45connect system makes lengthy manual cabling work a thing of the past. All the connections can be created simply, quickly and safely using terminated components.

Plug connections

All the plug connections are equipped with the GST18i connector systems and strain relief. Black and white connectors and cable colours are suitable for labelling the different circuits. Connection cables with cross-sections of 1.5 mm² or 2.5 mm² and a wide range of plug connectors offer the right solution for every requirement.

Connection adapters

The connection adapters can be connected to the socket outside the universal support. The socket unit with connection adapter is then engaged in the universal support.

Connection adapter, socket

Modul 45connect sockets can be connected with a connection adapter. The simple plug connection removes the wiring work.

Workplace solutions – Deskboxes

Deskboxes by OBO offer direct access to power, data and multimedia connections for any workplace, such as in offices and meeting and conference rooms. Three different Deskbox solutions in high-quality material and elegant designs are available for individual requirements:

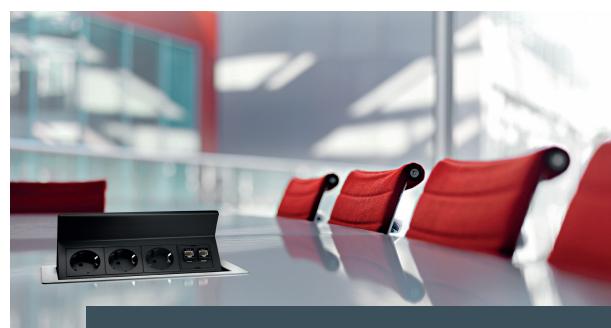

- Freely positionable Deskbox DB
- Lowerable Deskbox DBV
- Foldable Deskbox DBK

Freely positionable Deskbox DB

Lowerable Deskbox DBV

Foldable Deskbox DBK

The DB Deskbox

Very flexible.

The aluminium housings of the DB Deskboxes with silver, anodised surfaces stand out through their compact structure and discreet design.

They offer the right connection solutions for all areas of application: 1–2 circuits, network connections and multimedia connections for TVs and beamers for meeting rooms are available.

Other variants of the Deskboxes are available on request.

Versatile

The DB Deskboxes allow comfortable and easy access to all connection devices directly at the workplace.

A large selection of preequipped and ready-for-connection Deskboxes are available.

The erectable type DB Deskbox offers the highest level of flexibility in positioning and fastening at the workplace.

Fastening clamps allow quick and easy mounting of the Deskboxes to the tabletop, with the benefit being that there is no damage to the tabletop, e.g. from fastening holes or through wood screws.

Additional fastening options for fixed mounting on or under the tabletop are available as accessories.

The lowerable Deskbox DBV

Gone in a flash.

The lowerable DBV Deskbox offers the largest possible connection solutions in the smallest space.

Der Einbau der DBV erfolgt in einer Bohrung in der Tischplatte. Somit verschwindet die Anschlusstechnik dezent unter der Tischplatte. Hierfür wird eine passende Lochsäge als Montagewerkzeug angeboten.

The covers visible in the tabletop are available painted silver or in high-quality stainless steel. Other variants of the Deskboxes are available on request.

Surfaces

The Deskbox DBV is supplied as standard with the surface in anodised silver. The following variants are available on request:

- Coloured as old brass
- Chrome-plated
- Black anodised

Cover variants

The standard cover is made of plastic and is painted silver or is solid stainless steel. On request, you can also obtain it in

- Plastic, painted black
- Steel, chrome-plated
- Coloured as old brass

The foldable Deskbox DBK

A great package.

If necessary, the Deskbox DBK is simply folded up – using the push-to-open function: The connection devices are then easily accessible.

The inserted cables are run out of the closed Deskbox via the integrated brush bars.

They offer the right connection solutions for all areas of application: 1–2 circuits, network connections and multimedia connections for TVs and beamers for meeting rooms are available.

Other variants of the Deskboxes are available on request.

Device installation widths

The Deskbox DBK is available in four widths. This results in the following device installation widths for equipment:

- 150 mm
- 200 mm
- 250 mm
- 300 mm

Surface variants

The DBK Deskbox is supplied as standard with the surface brushed stainless steel. The following variants are available on request:

- Painted black
- Pure white lacquered

Plastic materials

ABS/ ASA	Acrylonitrile butadiene styrene
Temperature resistance:	To about minus 40 °C*, permanently up to 70 °C, briefly up to 85 °C
Resistant to:	Formic acid, citric acid, lactic acid
Unstable with:	Acetone, petrol, benzene, solvents for paints and butyric acid, chlorine, acetic acid, nitric acid.
Conditionally resistant to:	Hydrochloric acid, sulphuric acid.
Risk of stress cracks:	Relatively high, similar to polystyrene.
PA	Polyamide
Temperature resistance:	Permanently up to approx. 90 °C, briefly up to around 130 °C, and to around minus 40 °C*
Resistant to:	Petrol, benzene, diesel oil, acetone, solvents for paints and lacquers, oils and greases
Unstable with:	Bleach, most acids, chlorine.
Risk of stress cracks:	Low in humid conditions; only with some aqueous salt solutions. Highly desiccated parts (high temperature and extremely low air humidity) are highly sensitive to fuels and various solvents.
PA/ GF	Polyamide, fibreglass reinforced
Temperature resistance:	Permanently up to approx. 100–110 °C, briefly up to around 160 °C, and to around minus 40 °C*
Resistant to:	Petrol, benzene, diesel oil, acetone, solvents for paints and lacquers, oils and greases. Slightly susceptible to stress cracking.
Unstable with:	Bleach, most acids, chlorine.
Risk of stress cracks:	Low in humid conditions; only with some aqueous salt solutions. Highly desiccated parts (high temperature and extremely low air humidity) are highly sensitive to fuels and various solvents.
PBPT	Polybutylene terephthalate
Temperature resistance:	Permanently up to approx. 120 °C, briefly up to around 140 °C and to around minus 40 °C*.
Resistant to:	Petrol, diesel oil, most weak acids, oils and greases.
Unstable with:	Strong acids, chlorine, fluorine, bromine vapour, bleach, trichloroethylene, methylene chloride.
Conditionally resistant to:	Acetone, ammonia, benzene.
PE	Polyethylene
Temperature resistance:	Hard types permanently up to approx. 90 °C, briefly up to approx. 105 °C, soft types permanently up to approx. 80 °C, briefly up to approx. 100 °C and to approx. minus 40 °C*.
Resistant to:	Alkalies and inorganic acids.
Unstable with:	Chlorine, hydrocarbons, oxidising acids.
Conditionally resistant to:	Acetone, organic acids, petrol, benzene, diesel oil, most oils.
Risk of stress cracks:	Stress cracks can be caused by, among other things, acetone, various alcohols, formic acid, ethanol, petrol, benzene, butyric acid, acetic acid, formaldehyde, various oils, petroleum, propanol, nitric acid, hydrochloric acid, sulphuric acid, soap solutions, turpentine, trichloroethylene, citric acid.
PP/GF	Polypropylene, fibreglass reinforced
Temperature resistance:	Permanently up to approx. 90 °C, briefly up to around 110 °C, and to around minus 30 °C. Chem. resistance generally as for polyethylene
Resistant to:	Alkalies and inorganic structures
Unstable with:	Chlorine, hydrocarbons, oxidising acids.
Risk of stress cracks:	Low, only with some acids such as chromic acid, hydrofluoric acid and hydrochloric acid, as well as nitrogen oxide.

PC	Polycarbonate
Temperature resistance:	Permanently up to approx. 110 °C (in water 60 °C), briefly up to 125 °C, and to below minus 35 °C*
Resistant to:	Petrol, turpentine, most weak acids.
Unstable with:	Acetone, benzene, chlorine, methylene chloride, most concentrated acids.
Risk of stress cracks:	Relatively low, media which can cause tension cracking include petrol, aromatic hydrocarbons, methanol, butanol, acetone, turpentine.
PC/ ABS	Polycarbonate/acrylonitrile butadiene styrene
Temperature resistance:	-30 °C to + 90 °C, briefly up to approx. 105 °C, melting range at approx. 200 °C, thermal decomposition at 300 °C. Material thicknesses of 1.5 mm or more can achieve UL94 V-0. At material thicknesses of 1 mm or more, the glow wire temperature of 960 °C according to IEC 60695-2-12 is achieved.
Resistant to:	Mineral acids, organic acids and aqueous salt solutions
Conditionally resistant to:	Alkalies, hydrocarbons, aromatics and (in trace form) a series of greases and oils.
POM	Polyacetal
Temperature resistance:	Permanently up to approx. 100 °C, briefly up to around 130 °C and to around minus 40 °C*
Resistant to:	Acetone, ether, petrol, weak acetic acid, benzene, heating oil, oils and greases, toluene.
Unstable with:	Methylene chloride, trichloroethylene, hydrochloric acid, nitric acid, sulphuric acid.
Risk of stress cracks:	Low
PP	Polypropylene
Temperature resistance:	Permanently up to approx. 90 °C, briefly up to around 110 °C, and to around minus 30 °C. Chemical resistance generally as for polyethylene.
Resistant to:	Alkalies and inorganic acids.
Unstable with:	Chlorine, hydrocarbons, oxidising acids.
Conditionally resistant to:	Acetone, organic acids, petrol, benzene, diesel oil, most oils.
Risk of stress cracks:	Low, only with some acids such as chromic acid, hydrofluoric acid and hydrochloric acid, as well as nitrogen oxide.
PS	Polystyrene
Temperature resistance:	Because of its relatively high sensitivity to the effects of chemicals, its use is not recommended at temperatures above normal room temperature, about 25 °C. Resistance to cold: to about minus 40 °C*.
Resistant to:	Alkalies, most acids, alcohol.
Unstable with:	Butyric acid, concentrated nitric acid, concentrated acetic acid, acetone, ether, petrol and benzene, solvents for paints and lacquers, chlorine, diesel fuel.
Conditionally resistant to:	Oils and greases.
Risk of stress cracks:	Relatively high. Stress cracks can be caused by, among other things, acetone, ether, petrol, cyclohexane, heptane, methanol, propanol and the softeners of some mixes used in PVC cables.

PVC	Polyvinyl chloride
Temperature resistance:	Permanently up to approx. 65 °C, briefly up to around 75 °C and to around minus 30 °C.
Resistant to:	Weak acids, alkalis, oils and greases, petrol
Unstable with:	Strong acids, benzene, acetone, iodine, toluene, trichloroethylene.
Risk of stress cracks:	Low, only with some solvents such as benzene and acetone.
Material designation according to DIN 7748:	PVC-U-E-D-080-04-28
Tensile strength to DIN 53 455:	Min. 40 N/mm ²
Elongation at tear according to DIN 53 455:	Min. 65%
Impact resistance according to DIN 53 481:	Min. 20 KV/mm
Surface resistance according to DIN 5 3 482:	Min. 10 10
Thermoforming resistance according to DIN 53 460/B:	Min. 75 °C
Flammability according to UL 94:	Level V0
Fire behaviour according to EN 13501-1	C-s3,d0

The minus values apply only for parts in the idle condition with no severe impact stress. There is no plastic that is resistant to every chemical. The agents listed are only a small selection. Plastic parts are especially at risk in the presence of chemicals and high temperatures. Stress cracks may occur. If in doubt, please consult us and/or ask for a detailed chemical resistance table. Stress crack formation: Stress cracks may occur if plastic parts under

tension are exposed to chemicals at the same time. Parts made of polystyrene and polyethylene are particularly susceptible. Stress cracks may even be caused by agents to which the plastic in question is resistant in the absence of stress. Typical examples of parts under constant stress when used as intended: grip clips, intermediate connectors of cable glands, ribbon clips.

HoverCube VH/VHF

Suspended energy distributor for workplaces and machinery in industry, the trades and in training areas. The HoverCubes can be placed freely in the room. They are supplied from the ceiling. Depending on the protection rating, they can be equipped flexibly to supply power, data and media technology through to work media such as compressed air.

System description

Deskboxes

Deskboxes by OBO offer direct access to power, data and multimedia connections for any workplace, such as in offices and meeting and conference rooms. Three different Deskbox solutions in high-quality materials and elegant designs are available for individual requirements.

Freely positionable Deskbox DB

High-quality aluminium, slim design and variable installation options. The Deskbox DB can be freely positioned at the workstation and offers direct access to all connection solutions.

Mounting aid

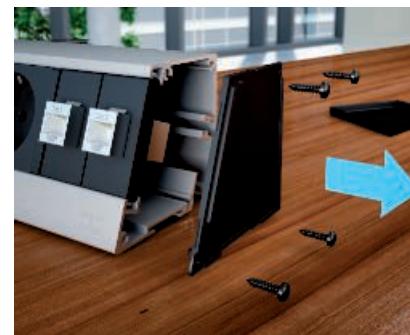

Preparation of fastening clamps

The appropriate fastening clamps are placed on the tabletop and screwed down.

Dismantling of the design panel

The first step for the cable connection of the data technology components is the removal of the design cover.

Dismantling of the housing cover

Open the housing cover located under the design cover.

Data technology connection

Simply connect the data technology couplings using standard universal cables.

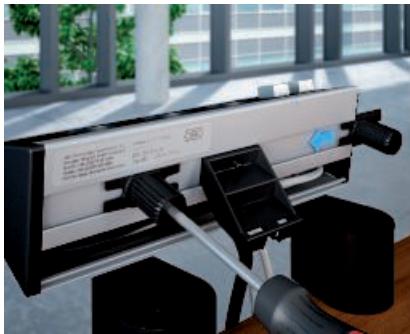

Mounting of the housing cover

When the connection work has been completed, the housing cover is reattached and screwed down tight.

Preparation of Deskbox fastening

The fastening elements of the fastening clamps are inserted into the housing profile from the side. A Flexkanal holder can also be mounted as an option.

Fixing of the Deskbox fastening

The aligned fastening elements are fixed using a screw.

Mounting of the Deskbox on the fastening clamp

Simply insert the pre-mounted Deskbox into the fastening clamps from above.

Mounting of the design panel

When the mounting work has been completed, reattach and engage the design panel.

Flexkanal fastening on Deskbox

The supply lines can be bundled using a Flexkanal and can be fastened on the pre-mounted Flexkanal holder.

Deskbox mounting with fastening clamp

The Deskbox with fastening clamps is ready-mounted and ready for use.

Preparation for fastening stand mounting

Drill holes (\varnothing 16 mm) in the tabletop are required to mount the fastening stands.

**Mounting of the fastening stands**

The fastening stands are inserted into the mounting drill hole and screwed tight.
Note: Can be used in tabletops of up to 50 mm thickness.

**Mounting of the Deskbox on the fastening stand**

Push the Deskbox onto the fastening stands from the side. The design panel must be removed in advance.

**Deskbox mounting with fastening stand**

The Deskbox with fastening stands is ready mounted and ready for use.

**Preparation for fastening set, table mounting**

Drill holes (\varnothing 10 mm) in the tabletop are required to mount the fastening sets.

**Pre-mounting of the fastening set, table mounting**

The fastening elements are inserted into the mounting drill hole.
Note: The supplied fastening screws (M4 x 40 mm) can be used for tabletops of up to a maximum thickness of 32 mm.

**Deskbox mounting on the fastening set, table mounting**

The Deskbox can be slid onto the fastening elements from the side. The design panel must be removed in advance.

**Finished mounting of the fastening set, table mounting**

When the Deskbox is positioned, the fastening elements can be screwed tight.

**Deskbox mounting with fastening set, table mounting**

The Deskbox is ready-mounted and ready for use directly on the tabletop.

**Mounting of the fastening set, under-table mounting**

The fastening elements are connected to the tabletop using the wood screws contained in the scope of delivery.

Mounting of the Deskbox on the fastening set, under-table mounting

The Deskbox can be slid onto the fastening elements from the side. The design panel must be removed in advance.

Mounting of the Deskbox with fastening set, under-table mounting

The Deskbox is ready-mounted and ready for use under the tabletop.

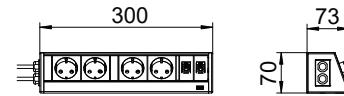

Cable connection, energy technology

The energy technology of the Deskbox is always equipped ready for connection and tested according to VDE directives. There is no need to remove the device cover on the energy side.
